

1 Q. What are the planning and scheduling targets?

2

3

4 A. With only one year of history to draw upon, Hydro is in the early stages of
5 analyzing planning and scheduling measurements. As a result, no regional
6 targets have been set to date. However, it is Hydro's intention to set planning
7 and scheduling targets, for the measurements outlined in IC 85 NLH, for
8 each operational region by the end of 2006.
