

1 Q. Provide the results of the simulated average hydraulic production for each of
2 the ten consecutive years in a format comparing average energy by plant to
3 the 2006 GRA forecast. (NP-35 NLH)

4

5

6 A. Results for the simulated average hydraulic production for each of the ten
7 years are shown below (in GWh). Note that the production from the Snook's
8 Arm, Venam's Bight and Roddickton mini-hydro facilities were not modeled,
9 and account for the 7.15 GWh difference between the hydraulic production
10 estimate included in Regulated Activities evidence, Schedule VI J. R. Haynes
11 and the total amount shown below.

Year	Bay d'Espoir	Upper Salmon	Granite Canal	Hinds Lake	Cat Arm	Paradise River	TOTAL
1	2760.50	608.67	230.66	305.41	651.21	36.05	4592.50
2	2654.32	570.70	221.95	338.29	666.30	36.13	4487.68
3	2644.08	567.35	220.17	338.50	663.68	36.12	4469.90
4	2643.88	567.29	220.20	338.32	658.93	36.12	4464.73
5	2644.08	567.37	220.13	338.33	659.54	36.12	4465.56
6	2644.02	567.35	220.08	338.33	659.57	36.12	4465.47
7	2643.83	567.29	220.05	338.33	659.25	36.12	4464.86
8	2643.83	567.29	220.05	338.33	659.24	36.12	4464.85
9	2643.82	567.28	220.05	338.33	659.25	36.12	4464.86
10	2643.82	567.28	220.05	338.33	659.25	36.12	4464.86
