

1 Q. Based on the frequency distribution presented, what percentage of data
2 points are greater than the 2007 forecast hydraulic production and what
3 percentage of the data points are lower than the 2007 hydraulic production?
4 (NP 122 NLH)

5

6

7 A. Based upon the data points used to develop NP 122 NLH, 37.5% (21 data
8 points) are less than hydraulic production forecast for 2007, and 62.5% (35
9 data points) are greater than the 2007 hydraulic production forecast.
