

1    Q.    What is the mean, median and mode for the data points provided in the  
2           frequency distribution? (NP 122 NLH)

3

4

5    A.    Based upon the data points used to develop NP 122 NLH, the mean was  
6           4465 GWh/year, the median was 4520 GWh/year, and the modal group was  
7           the 4450-4550 GWh/year group.
