

1 Q. If Industrial Customers increase energy consumption without increasing
2 billing demand, what price do they pay for the increased firm energy? (Cost
3 of Service Evidence, page 17, lines 7 to 16)
4
5

6 A. Increased energy consumption will be billed at the industrial firm energy rate,
7 plus the RSP adjustment rate in effect for that month.
8

9 In addition to the firm energy charge, the load variation component of the IC
10 RSP will charge the Industrial Customer class with differences between the
11 incremental cost of fuel at Holyrood and the firm energy charge. This
12 amount will be factored into the IC RSP adjustment rate for the following
13 year.
