

1    Q.    Would an inverted block rate for industrial customers, with the second block  
2           priced at Holyrood fuel cost, provide a proper price signal for the  
3           conservation of natural resources. Please fully explain your answer.

4

5

6    A.    Yes, an inverted block rate for Industrial Customers with the second block  
7           priced at Holyrood fuel costs would provide a proper price signal for the  
8           conservation of natural resources. See also the response to PUB 14 NLH.
