

1    Q.    Please provide all data and documents used in developing the customer  
2           allocation factors of the cost of service study.

3

4

5    A.    The number of rural customers is determined through the rural sales  
6           forecast, and is the average of two years. Meter weighting is determined by  
7           the relative cost of equipment required to meter each customer group.

8           Please see attached for calculations.
