

1 Q. Re page B-81: provide existing guidelines for the use, storage, handling and
2 access to snowmobiles and ATV's owned by Hydro.

3
4

5 A. Hydro maintains a fleet of ATV's and snowmobiles at various locations
6 around the province. These seasonal vehicles are utilized primarily by
7 operations personnel in the performance of routine maintenance, or in
8 emergency response to forced outages. The equipment is normally stored on
9 storage ramps at the depots during the off-season and on trailers during the
10 maintenance season. Access to these machines is exclusively for work
11 purposes and the machines are returned to the depot at the completion of
12 any particular assignment.
