

1 Q. Has there been consideration as to what extent the other capital projects  
2 proposed for Holyrood (for instance B-16 Upgrade Unit No. 3  
3 Turbine/Generator; B-18 Water Treatment Pilot Plant; B-22 Upgrade Unit 3  
4 Air Preheater Steam Condensate System) will result in “thrown away” costs,  
5 depending on the results of the Holyrood Condition Assessment? Provide  
6 particulars of any such costs.

7

8

9 A. This study will not result in other capital proposals becoming “throw away”  
10 costs. The study data will permit Hydro to develop a long term least cost plan  
11 for the continued operation or redevelopment of the site, which would not  
12 result in significant changes to the plant for at least 6 to 8 years. Benefits  
13 from two of the proposals referenced will be realized within that time frame  
14 and the third proposal (B-18 Waste water treatment plant) is required to  
15 address a chemical waste problem.
