

1 **B-14 Holyrood Condition Assessment, \$3,334,900**

2 Q. How has it been determined that the cost of a Holyrood Condition
3 Assessment, with its various components, will cost \$3.3 M?

4

5

6 A. This study has two principal components, condition assessment and several
7 related feasibility studies. The cost estimate for the condition assessment is
8 based on the cost of a similar assessment project undertaken by another
9 utility and on discussions with the engineering company that performed the
10 work. The cost estimate for the feasibility studies was based on similar
11 feasibility studies performed by Hydro and in consultation with an
12 engineering company.
