

1 **B-109 System Security Upgrades, \$667,900**

2 Q. Have there been any specific security upgrades developed to date? Please  
3 provide a copy of the three-year plan.  
4

5  
6 A. With respect to the recommendations of the consultant reports listed in the  
7 response to PUB 146.0 NLH, there have been no specific security upgrades  
8 completed to date. However, in recent years, the capital program has  
9 included some miscellaneous security upgrades such as fence & gate  
10 improvements, surveillance cameras and security access card systems at  
11 some locations, and some IT security enhancements. These miscellaneous  
12 upgrades were considered in the consultants' study of Hydro facilities and  
13 incorporated into their conclusions and recommendations. Security  
14 considerations are also reviewed in all capital budgets, where appropriate.  
15 Because these reports and the specific details of work proposed by Hydro  
16 deal with Hydro system security issues, they are confidential and should not  
17 be released into the public record. However, Hydro would be willing to  
18 provide them to the Board and Counsel for the Intervenors, in confidence.
