

1    Q.    Provide details of the scope of work that was communicated to the  
2           engineering company that held discussions with NLH in relation to the  
3           costing of this project as referenced in PUB 11.0 NLH.

4

5

6    A.    The only details provided to the engineering company which was consulted  
7           to discuss this project were the age, operating hours and general condition of  
8           the Holyrood Plant. The firm was asked to estimate the cost of performing a  
9           typical EPRI based condition assessment study based on their experience  
10          with similar work.
