

1 **B-61 Replace Distribution Poles, \$744,000**

2 Q. Provide copies of reports resulting from preventative maintenance
3 inspections that indicate the condition of the poles to be replaced in 2007 in
4 the three distribution systems included in this project.

5

6

7 A. The condition of the poles is not detailed in a report, but by verbal
8 communications with line crews. The poles in question are almost 40 years
9 old, which is at the end of their normal service life. This information,
10 supplemented by the local crews' patrols/knowledge of the lines in question,
11 assisted us in determining that these structures were required to be replaced
12 by 2007.
