

In reference to Schedule “B”, page 15 of 82, the purchase of portable diesel generation at a project cost of \$1,500,000:

Q. Please provide a list of all portable diesel generators located in the Province of Newfoundland and Labrador, either owned by Newfoundland Power or Newfoundland Hydro and the locations of these.

A. Newfoundland Power owns two portable diesel generating units. The installed capacity of the units are 700kW and 670kW, respectively. Both units are currently located at the Company’s Grand Bay Substation near Port aux Basques.

The Company is not aware of any portable diesel generating units owned by Newfoundland and Labrador Hydro.
