

**Q. Please state accurately where the company plans to locate the proposed purchase of the portable diesel generator and provide Newfoundland Hydro's consent that this placement would be optimum for joint usage by these companies.**

A. Please refer to the Company's response to the Public Utilities Board Request For Information PUB 4.1, Attachment A, for the report analyzing the sizing and unit location associated with portable diesel generation.

The Company has not sought the consent of Newfoundland and Labrador Hydro as to where the unit will be located. The portable generating unit, by its nature, is capable of being relocated on short notice to all areas of the island portion of the province when required.
