

In reference to Schedule “B”, page 18 of 82:

Q. Please provide materials and costs for the upgrades at Blaketown, Clarenville and St. John’s main stations respectively. Please identify any and all “others” that are to be upgraded.

A. Table 1 below provides a breakdown of the estimated costs for site and foundation upgrades at Blaketown, Clarenville and St. John’s Main Substations as well as an estimate of anticipated costs for site and foundation work at other substations. The specific location of other substations to be upgraded will be based on site assessments completed as part of the *Inspection and Testing of Substation Concrete Pads and Foundations* report, a copy of which is contained in Attachment F of the response to CA-20 (b).

Table 1
Estimated 2003 Capital Expenditures – Rebuild Substations
Site and Foundation Upgrades
(Schedule B, page 18 of 82)

Substation	Labour	Non-Labour	Total
Blaketown	\$10,000	\$65,000	\$75,000
Clarenville	2,400	2,600	5,000
St. John’s Main	5,000	25,000	30,000
Other	4,600	35,400	40,000
Total	\$22,000	\$128,000	\$150,000
