

In reference to Schedule “B”, page 43 of 82 – Reconstruction, at a project cost of \$2,745,000:

Q. Please provide the list of “high priority” projects and justify the expenditures in each region and area stated on page 43 of 82.

A. High priority projects arise as the result of storm damages, operational problems and line inspections conducted in the budget year and, as such, cannot be itemized at budget time. The project cost, therefore, is estimated based on average historical expenditures related to unplanned reconstruction.
