

**Q. Please advise as to the number of portable transformers that Newfoundland Power has and the location of these portable transformers. Please advise as to the number of portable transformers that Newfoundland Hydro has and the location of these portable transformers.**

**A.** Newfoundland Power currently has three portable transformers. Table 1 below provides information on each portable transformer and its location when not in use (“Home Location”). These portable transformers can be quickly relocated for installation as required throughout the Company’s service area. Consequently, at any given time they may be located somewhere other than their Home Location.

<b>Table 1</b> <b>Newfoundland Power</b> <b>Portable Transformers</b>			
<b>Portable Transformer</b>	<b>Capacity (MVA)</b>	<b>Voltage (kV)</b>	<b>Home Location</b>
P-135	10	66 – 25/12.5/4.16	Mount Pearl
P-335	25	138/66 – 25/12.5	Corner Brook
P-435	50	138/66 – 25/12.5	Mount Pearl

Appendix 2 of the Newfoundland Power/Newfoundland and Labrador Hydro *Sharing of Services and Equipment* agreement, a copy of which is provided in response to Request for Information CA-17 (I), indicates that Newfoundland and Labrador Hydro has two portable transformers available. Table 2 below provides information on these two portable transformers, and their Home Location.

<b>Table 2</b> <b>Newfoundland and Labrador Hydro</b> <b>Portable Transformers</b>			
<b>Portable Transformer</b>	<b>Capacity (MVA)</b>	<b>Voltage (kV)</b>	<b>Home Location</b>
1	15	138/69 – 25/12.5	Bishops Falls
2	1.5	25 – 12.5/4.16	Bishops Falls
