

- 1 **Q. Provide the number of unmarked vehicles in Newfoundland Power's fleet from 1997**
2 **to 2002.**
3
4 A. This information is not readily available on a year by year basis.
5
6 As of November 1998, Newfoundland Power had a total of 20 unmarked vehicles in its
7 fleet. This information was contained in an undertaking from Newfoundland Power's
8 1998 General Rate Proceeding.
9
10 As of October 2002, Newfoundland Power had a total of 44 unmarked vehicles in its
11 fleet.
12
13 The increase from 1998 to 2002 is the result of making unmarked (as opposed to marked)
14 vehicles available to employees, such as General Forepersons, Engineers and
15 Technicians, who are routinely on call for response to electrical system difficulties.
