- 1 Q. (2017 GRA, Volume 1, page 1.5) It is stated (lines 2 to 8) *“This presents an*
2 *opportunity to reduce the use of costly Holyrood generation by using lower cost off-*
3 *island purchases in 2018, 2019, and 2020. Hydro’s 2018 and 2019 Test Year revenue*
4 *requirements, as submitted, reflect the continued use of Holyrood fuel with no*
5 *access to off-island purchases. Hydro is proposing that any costs or savings*
6 *associated with the use of the Labrador-Island Link and the Maritime Link prior to*
7 *the full commissioning of the Muskrat Falls Project be set aside in a deferral*
8 *account.”* Please show how this approach is consistent with requirements set out in
9 the Electrical Power Control Act, 1994 that rates be reasonable and not unjustly
10 discriminatory, and established based on forecast costs for the supply of power.
