

1 Q. (Reference 2017 GRA Volume I, page 2.16) With respect to the net metering  
2 program, what is Hydro’s aggregation policy; i.e., different generation technologies  
3 at one site, multiple generation facilities owned by one customer, a single  
4 installation owned by several customers (community solar), tenant net metering  
5 aggregation, multi-site metering aggregation, etc?  
6  
7

8 A. Hydro’s Net Metering Program was approved by the Board in Order No. P.U.  
9 17(2017). Under Hydro’s Net Metering Program, while a net metering customer’s  
10 generating facility may consist of more than one generation technology, meter  
11 aggregation is not permitted and only one metering point per account and property  
12 is permitted.
