

1 Q. **2018 Cost Deferral and Interim Rates Evidence - Revision 2, November 14, 2018**
2 Evidence, Schedule 1, page 6 of 81, lines 9-11 - Tacora recently announced the re-
3 opening of the Wabush Mines facility in 2019. What is the 2019 forecast load for
4 this facility and how will the re-opening affect the 2019 off-island purchases
5 forecast in Table 1?
6
7

8 A. The most recent 2019 load forecast for Tacora includes a peak power on order of 53
9 MW and 285.4 GWh. Hydro estimates the re-opening of the facility could result in a
10 reduction in off-island purchases of approximately 30 GWh for 2019. This would
11 reduce the total expected supply from off-island purchases in 2019 from 716 GWh,
12 as shown in Table 1 of the 2018 Cost Deferral and Interim Rates Evidence, to 686
13 GWh.
