

1 Q. Reference: Hydro's 2015 & 2016 Supply Cost Recovery Application Evidence,
2 October 11, 2017, Page 6. Hydro states:

3

4 *"...the use of the Holyrood GT in 2015 was in support of spinning reserves and to*
5 *provide generation during the loss of a major generating unit, and also required to*
6 *reliably facilitate planned generation and transmission outages."*

7

8 Did Hydro make any changes to its approach to using emergency and standby
9 generation for *spinning reserves* over the 2015–2017 period? If so, please describe
10 the changes and why they were made.

11

12

13 A. Please refer to Hydro's response to NP-NLH-022 for a description of Hydro's
14 approach to using emergency and standby generation for *spinning reserves* over
15 the 2015–2017 period and why these changes were made.
