

- 1 **Q. Does Newfoundland Power have any information, or insight, on the extent to which**  
2 **other medium duty vehicles should be included in the electrification analysis besides**  
3 **delivery trucks, school buses, transit buses, and intercity buses?**  
4
- 5 A. Newfoundland Power does not have information on specific medium duty vehicles that  
6 should be included in the electrification analysis.  
7
- 8 The Conservation Potential Study currently being completed by Newfoundland Power  
9 will assess the potential for electrification of vehicles. The study will assess  
10 electrification potential based upon 4 vehicle categories: (i) light duty vehicles; (ii)  
11 medium duty vehicles; (iii) heavy duty vehicles; and (iv) buses. With some electric  
12 options available in all 4 categories, the Conservation Potential Study will not exclude  
13 any particular vehicle type.  
14
- 15 Please see response to Information Request PUB-NP-012 for more information on the  
16 Conservation Potential Study.
