

1 **Q. Please provide the numbers of preventive maintenance tasks for: (a) terminal**
 2 **stations, and (b) distribution substations deferred more than 3 months past**
 3 **program schedules in 2017, 2018 and 2019 to date.**

4
 5 A. Newfoundland Power's preventative maintenance tasks for substations follow time-based
 6 targets.¹ Certain tasks, such as substation inspections and infrared scans, are required to
 7 be completed within a specific time period. Other tasks are considered compliant with
 8 the preventative maintenance program if they are completed within the calendar year for
 9 which they are scheduled. The Company tracks completed and uncompleted tasks in
 10 accordance with these requirements.

11
 12 Table 1 shows the quantity of preventative maintenance tasks completed and not
 13 completed in accordance with required timelines in 2017, 2018 and 2019 year to date
 14 ("YTD").

Table 1:
Completed and Uncompleted Preventative Maintenance Tasks
(2017-2019 YTD)

	2017	2018	2019 YTD
Quantity Completed	2,094	1,959	530
Quantity Uncompleted	91	79	10

¹ Newfoundland Power does not use the term *terminal station* for any of its substations. All Company stations that include transformation and switching equipment for transmission, generation and distribution purposes are referred to as *substations*.
