

1 Q. Does Newfoundland Hydro have access to hourly charging and load profiles
2 available for the newly electrified St. John's port? If so, please provide. If not, does
3 Newfoundland Hydro know of the fraction of docking happening at each hour of the
4 day (winter and summer separately)? Please provide any other descriptive
5 information Newfoundland Hydro may have concerning these end uses, if available.
6
7

8 A. The St. John's Port Authority's facilities are retail customers of Newfoundland
9 Power and therefore any available charging and load profile information for the St.
10 John's port facilities would have to be provided by Newfoundland Power. Hydro
11 does not have access to hourly charging and load profiles for the newly electrified
12 St. John's port and does not have possession of information with respect to hourly
13 docking at the St. John's port.
