

1 Q. **Reference: 2018 Cost of Service Methodology Review Report dated November 15, 2018**

2

3 On page 14 (lines 24 to 25) it is stated *“Hydro recommends that all functionalized*
4 *transmission costs be classified as 100% demand related. This is consistent with the*
5 *approach currently used in the cost of service study.”* In Hydro’s October 19, 2017 letter to
6 the Board referencing the Consumer Advocate’s challenge of Hydro’s proposed
7 classification of transmission assets as 100% demand related, Hydro indicated that issues
8 relating to the cost of service methodology are more efficiently addressed in the proposed
9 2018 hearing on the cost of service methodology (page 2). Please provide all studies and
10 documentation relating to Hydro’s assessment of whether a portion of transmission assets
11 should be classified as energy that have been carried out in support of its application on the
12 Cost of Service Methodology.

13

14

15 A. Please refer to Newfoundland and Labrador Hydro’s responses to CA-NLH-013, CA-NLH-
16 016, CA-NLH-017, and PUB-NLH-034.
