

1 **Q:** Page 38 of the Brattle Group report recommends that *“that the capital*
2 *additions and operations and maintenance costs associated with Holyrood 3's use*
3 *as a synchronous generator be classified as energy, since those costs are largely*
4 *dependent on kWh production.”*

5
6 **The Brattle Group is asked to confirm that absent requirement for its use as a**
7 **synchronous condenser, Hydro would not use Holyrood Unit 3 for energy**
8 **generation purposes.**

9
10 **A.** Brattle is not in a position to confirm or deny the statement as it requires an opinion
11 regarding Hydro's operations.
