

- 1 **Q. Reference Prefiled Evidence of Larry Brockman: Has Mr. Brockman ever**  
2 **recommended a classification methodology for hydro generation assets other than**  
3 **the equivalent peaker? If so, please provide citations to the proceeding and provide**  
4 **the report.**  
5
- 6 A. Mr. Brockman has only recommended classification methodologies for hydro generation  
7 in two jurisdictions. In both Newfoundland and Labrador (1992) and Nova Scotia  
8 (1993), Mr. Brockman recommended the use of the equivalent peaker method for  
9 classifying hydraulic generation assets.  
10
- 11 Other than Mr. Brockman's agreement with the continued use of system load factor for  
12 Hydro's older hydraulic units in this proceeding, Mr. Brockman has not recommended  
13 any method other than the equivalent peaker method for the classification of hydro  
14 generation assets.
