

1 Q. **Reference: Schedule 1 – Long-Term Supply for Southern Labrador – Phase 1**

2 Page 4, line 2, states “The Port Hope Simpson Diesel Generating Station has three units with an  
3 installed capacity of 1,725 kW...” What is the plan for the three units once the new regional  
4 diesel generating station is completed in Port Hope Simpson?

5

6

7 A. Newfoundland and Hydro plans to reuse all three units currently in service in Port Hope  
8 Simpson. Units 2099 and 2100 are expected to be utilized in the Makkovik Diesel Generating  
9 Station, which has two units<sup>1</sup> expected to reach end-of-life in the 2024–2026 timeframe. Unit  
10 2073 will likely be installed in the St. Lewis Diesel Generating Station, which has a unit<sup>2</sup> of the  
11 same size projected for replacement in 2026.

---

<sup>1</sup> Units 2029 and 3033.

<sup>2</sup> Unit 2080.
