

- 1 **Q. (2021 Electrification, Conservation and Demand Management Application, Volume**
2 **1, Exhibit 2, Figure 1) Please confirm that it will be 7 years (2027) before the**
3 **electrification program has an appreciable impact on rate mitigation. Why 7 years?**
4
- 5 A. Electrification is forecast to provide a positive impact on rate mitigation in 6 years.
6 Specifically, 2026 is the first year that incremental revenues from electrification
7 initiatives exceed incremental system costs and recovery of costs related to capital
8 investments and program expenditures.
