

1 **Q. EV Charging Network – Exhibit 2**

2
3 **Please provide a map of the Province indicating the locations of the EV charging**
4 **stations that Newfoundland Power has included in the 2021-2025 Plan. If possible,**
5 **also provide a similar map indicating the locations of all EV charging stations that**
6 **will be installed by both utilities by the end of 2025.**

7
8 A. Figure 1 shows the locations of EV charging stations to be installed by Newfoundland
9 Power and Newfoundland and Labrador Hydro (“Hydro”) by year-end 2021.

10

**Figure 1:
EV Charging Stations by Year-End 2021**

1 The 10 Newfoundland Power charging stations shown in Figure 1 are pending approval
2 of the Company's *2021 Electrification, Conservation and Demand Management*
3 *Application*. The installation of EV charging stations over the period 2022 to 2025 will
4 be the subject of future capital budget applications by Newfoundland Power.

5
6 Newfoundland Power has not yet determined the locations of charging stations to be
7 installed over the period 2022 to 2025. The locations of future charging stations will be
8 selected based on specific criteria. These criteria include: (i) location along highways
9 and major transportation routes; (ii) the location of current and planned charging sites;
10 and (iii) the optimal distance between charging sites.¹ These criteria are consistent with
11 Federal Government recommendations.²
