

1 Q. The Application states that the failed diesel engine was new when installed in 2019 and had  
2 10,466 hours of operation. Was the failed diesel engine covered under a warranty? If yes, please  
3 provide the warranty details. If not, please explain why there was no warranty associated with  
4 the diesel engine.

5

6

7 A. The failed diesel engine was purchased with a 12-month warranty, which is the standard  
8 warranty period for CAT for prime power applications. As this engine failed after three years of  
9 service, it was no longer covered under warranty at the time of failure.
