

1 Q. Schedule 1: Evidence, page 12. Hydro is proposing to eliminate the Secondary Energy Rate on
2 the Labrador Interconnected System that is available for customers engaged in fuel switching.
3 Has Hydro provided any communication to CFB Goose Bay and/or any other customer who may
4 have availed of this rate regarding the proposed elimination of this rate? If so, please provide.

6

7 A. Only one customer, Canadian Forces Base Goose Bay (“CFB Goose Bay”), has availed of this
8 service in the past 15 years. That customer has not availed of this service in any significant
9 amount since 2013. Between 2013 and 2021, the service was only used to supply low amounts
10 of energy for station service requirements at their boiler substation. Newfoundland and
11 Labrador Hydro has not provided any communication to date to CFB Goose Bay as the service at
12 their boiler substation was disconnected in 2021 at their request.
