

Street Lighting (Pooled), \$1,646,000, p. 30 of 81

Q. Why, in this and in several other projects, does the 2008F, Adjusted Cost, which reflects 2008 dollars, not agree with the Total amount shown as the forecast expenditure for 2008?

A. In general the 2008F and the 2008 Adjusted Cost reflecting 2008 dollars should be the same. However, in some cases unusually high and low data is excluded from the adjusted cost for the purpose of calculating the historical annual expenditures.

In the 2009 Street Lighting project, Schedule B Page 31 of 81, the 2008 forecast cost for Exclusions of \$475,000 was an error. A revised Schedule B, Page 31 of 81, which corrects this error has been filed with the Responses to RFIs.
