

1 Q. A confirmation that there has been no environmental assessment in regard to the  
2 effects of the Water Management Agreement or the management of water  
3 thereunder, and particularly the management of water at Churchill Falls, including  
4 reservoirs, on the upper Churchill River basin, including reservoirs, tributaries and  
5 adjoining watersheds.

6

7

8 A. The Water Management Agreement and the management of water at the Upper  
9 Churchill facility, including its reservoirs, the Upper Churchill River basin, tributaries  
10 and adjoining watersheds have not been subject to an environmental assessment  
11 nor is such assessment required pursuant to applicable environmental legislation.  
12 The Water Management Agreement operates wholly within the existing operating  
13 parameters of the CF(L)Co facility and existing customer requirements for seasonal  
14 and hourly flexibility.
