

1    Q.    **Replace Vehicles and Aerial Devices, Vol. II, Tab 22**

2            How many vehicles which meet NLH's replacement criteria are not being replaced  
3            in 2010?

4

5

6    A.    None. However, six vehicles that were originally planned for replacement in 2010  
7            are not being replaced and have been deferred one year. This is a result of our  
8            annual review of the planned replacements and the six units did not meet all of the  
9            criteria. These vehicle replacements were deferred because their life cycle costs did  
10           not warrant replacement.
