

Vehicle Mobile Computing Infrastructure (Pooled), p. 91 of 96, \$272,000

Q. Please provide, if there is one available, an evaluation of the benefits associated with the 2009 expenditures relating to the equipping of NP vehicles with mobile computing infrastructure.

A. Newfoundland Power has not yet evaluated the benefits associated with the 2009 expenditures relating to the equipping of vehicles with mobile computing infrastructure.

The mobile computing infrastructure planned under the 2009 Vehicle Mobile Computer Infrastructure project is expected to be installed in the fall of 2009. Currently, testing of six units is underway to evaluate the functionality, ergonomics and overall effectiveness of equipment configuration alternatives. Accordingly, the evaluation of project benefits is not yet possible.
