

Q. Please provide a table showing the number of conversions from oil to electric heat for the period 2004 to current and forecast.

A. The Company does not have information related to the number of customers converting from oil to electric space heating. However, the Company does have estimates of the number of customers converting to and from electric space heating. This information does not identify the fuel that the electric space heating customer converted to or from (i.e. wood, oil, or propane).

Table 1 provides the estimated number of conversions to and from electric space heating for the period 2004 to 2009F. Table 1 also shows a forecast number of 2010 conversions to and from electric space heating based on existing rates and proposed rates.

Table 1
Conversions To and From Electric Space Heating
2004 – 2010F

Year	To Electric Space Heating	From Electric Space Heating	Net Electric Space Heating Conversions
2004	341	98	243
2005	310	164	146
2006	142	13	129
2007	402	119	283
2008	876	166	710
2009F	735	100	635
Existing Rates			
2010F	572	100	472
Proposed Rates			
2010F	466	100	366
