- Q. Please provide a copy of Newfoundland Power's five year financial forecast. Please forecast all changes in the revenue requirement and required rate action for the next five years.
- Attachment A is a copy of Newfoundland Power's current five year financial forecast for regulatory purposes (the "financial forecast"). The financial forecast is based on the latest available forecasts and management's best estimates. The financial forecast is subject to change as actual results for each of the forecast years become known and as assumptions and circumstances change.

In the years 2013 through 2016, revenue shortfalls are forecast for each year (see line 39, p. 1 of 9). A *revenue shortfall* is simply the change in the forecast financial results (expressed in terms of revenue) that would be required for the Company to recover all its forecast costs, including its forecast cost of equity.

In addressing a forecast revenue shortfall, a number of matters require consideration. Changes in sales, other costs or forecast assumptions may result in a forecast revenue shortfall not materializing or materially increasing. A forecast revenue shortfall could be addressed by regulatory actions such as deferred recovery of costs. Increasing customer rates is another means of addressing a forecast revenue shortfall.

By Order No. P.U. 43 (2009), Newfoundland Power was required to file its next general rate application no later than May 31, 2012 unless otherwise ordered by the Board. In Order No. P.U. 25 (2011), it was ordered that the process and timing to be followed with respect to the filing of Newfoundland Power's next general rate application would be established by a further direction of the Board. To date, no further direction has been made on this matter.

The financial forecast indicates a revenue shortfall for Newfoundland Power for 2013 of approximately \$3.5 million. Consideration of that shortfall, in the context of the Company's overall costs, could be the subject matter of a general rate application filed in 2012. Alternatively, the forecast revenue shortfall for 2013 might be capable of being addressed by way of cost deferrals. Newfoundland Power observes that in Order Nos. P.U. 30 (2010) and P.U. 22 (2011), the Board approved deferred cost recovery in each of 2011 and 2012 to address forecast revenue shortfalls of \$3.4 million and \$3.5 million respectively.

Given the foregoing, what action Newfoundland Power will take to address the revenue shortfalls indicated in the financial forecast is currently uncertain.

Newfoundland Power Inc. Financial Forecasts 2012-2016

<sup>&</sup>lt;sup>1</sup> The return on average rate base is calculated in accordance with the methodology approved in Order No. P.U 32 (2007).

#### Financial Foreacasts 2012 - 2016 Inputs and Assumptions

1 2 3	Forecast results for 2012 to 20 Order No. P.U. 36 (2010).	016 are based on electricity rates effective January 1, 2011 approved by the Board in
4 5	Specific assumptions include	:
6 7 8	Energy Forecasts:	Energy forecasts are based on economic indicators taken from the Conference Board of Canada forecast dated February 2, 2012.
9 10	Revenue Forecast:	The revenue forecast is based on the Customer, Energy and Demand forecast dated March, 2012.
11 12 13 14 15		Forecast revenues reflect, (i) recovery through the RSA of amounts associated with variances in employee future benefit costs, and (ii) recovery through the RSA of amounts associated with the Energy Supply Cost Variance Adjustment Clause for the period 2012 to 2016, all of which were approved by the Board in Order Nos. P.U. 32 (2007), P.U. 43 (2009) and P.U. 31 (2010).
16 17 18		The Supply Cost Variance Adjustment is approved by the Board for use up to and including 2013. For forecast purposes, Supply Cost Variance Adjustments are assumed through to 2016.
19 20 21	Purchased Power Expense:	Purchased Power Expense for 2012 includes a Board approved \$2.1 million per year amortization of the non-reversing balance in the Weather Normalization Reserve.
22 23 24 25		Purchased Power expense for 2012 to 2016 also reflects the operation of the Demand Management Incentive Account approved by the Board in Order No. P.U. 32 (2007). This mechanism provides for recovery of demand costs in excess of 1% variance from costs included in the 2010 test year.
26 27 28	Employee Future Benefit Costs :	Pension costs related to the 2005 Early Retirement Program are being amortized over a 10-year period from 2005 to 2015 as approved in Order No. P.U. 49 (2004).
29 30 31		Discount rate for Pension is assumed to be 5.25% for 2012 to 2016 and reflects management's best estimates based on the latest actuarial information.
32 33 34		Discount rate for OPEBs is assumed to be 5.25%% for 2012-2016 and reflects management's best estimates based on the latest actuarial information.
35 36		Expected return on pension assets is assumed to be 6.50% for 2012- 2016.
37 38 39		Pension funding is based on the latest actuarial information and assumes special funding payments of \$10.7 million per year for 2012 to 2016.
40 41 42	Cost Recovery Deferral:	2012 includes the deferred recovery of $$2.4$ million in costs related to the expiry of certain regulatory amortizations.
43 44 45		2012 and 2013 costs also include recoveries of \$0.3 million per year related to conservation program costs and \$0.3 million related to recovery of 2010 hearing costs in 2012.
46 47 48 49 50	Depreciation Rates :	Depreciation rates for 2012 to 2016 are based on the 2006 Depreciation Study. The 2010 Depreciation Study indicates an accumulated amortization variance deficit of approximately \$17.7 million. Subject to PUB approval, this variance is expected to increase the amortization of capital assets in future years and be recovered in future customer rates.
51 52	Operating Costs:	Operating costs for 2012 reflect management's best estimates.
53 54		Operating costs for 2013 to 2016 primarily reflect projected increases of 4.0% per year for labour and non-labour increases based on the GDP deflator.

Newfoundland Power Inc. Page 8 of 9

1	Capital Expenditure :	Capital Expenditures for 2013 to 2016 are as filed in the 2012 Capital Budget.
2		
3	Financing Costs:	Average short-term interest rates are assumed to be 2.16% for 2012, 2.55% for 2013,
4		3.00% for 2014 and 3.50% for 2015 to 2016.
5		
6		A \$75.0 million long-term debt issue is forecast to be completed March 15, 2014.
7		The debt is forecast for 30 years at a coupon rate of 6.75%. Debt repayments will be
8		in accordance with the normal sinking fund provisions for existing outstanding debt.
9
