

1 Q. Re: 2013 Capital Projects 500,000 and Over: p. C-60 Replace Vehicles and Aerial
2 Devices:
3 Please explain the reasons why Hydro is replacing Unit V1331 at 3.3 years with
4 only 34,377 kms on it (projected). What year and type of vehicle is it, what was its
5 cost and what will be replacing it?
6
7

8 A. Unit V1331 is a 2010 Honda, intermediate sized car, which is driven by a Vice
9 President in Hydro. This vehicle has been leased for three years and is not part of
10 the capital budget proposal to replace 18 light-duty and eight heavy-duty vehicles.
11 Since this lease was greater than \$5,000 (\$7,097 per year), Hydro should have
12 applied for approval at that time. This was inadvertently omitted. Hydro will apply
13 for any new vehicle leases over \$5,000 as required.
