

1 Q. Re: Report of FM Global of May 12, 2011 at D-8 ff:

2 Does the current filing represent a continued aggressive approach in relation to
3 Holyrood?

4

5

6 A. The current filing for Holyrood includes the projects Hydro has determined to be
7 necessary for the continued safe and reliable operation of the facility. The projects
8 pertain only to select critical systems and components that are necessary for
9 ensuring the plant's ability to provide generation to 2020 to meet projected
10 requirements and also synchronous condensing service after 2017.
