

1 Q. Re: 2013 Capital Projects Over 200,000 but less than 500,000: p. D-56 Upgrade
2 Public Safety Around Dams and Waterways: At p. D-61 it states that the risk
3 assessment done at Long Pond Reservoir “was the first in a series that Hydro will be
4 conducting over the next several years. . .” How many is Hydro planning to carry
5 out? Is it planning to do these itself or hire Hatch to do these?
6
7

8 A. The long term plan for Hydro is to carry out risk assessments for all of its dykes and
9 dams. In keeping with Canadian Dam Association Guideline, all dams are required
10 to have a risk assessment conducted. There will be approximately 10 to 12 reservoir
11 risk assessments required to capture data on in excess of 80 dams and dykes.
12 Typically consultants will be utilized to undertake these risk assessments.
