

1    Q.    Schedule 4 of the Application provides the forecast RSP drawdown for Island  
2    Industrial Customers. What loads are used in the calculation and what is the basis  
3    for selecting these loads? Why are 2016 loads reduced from those in late 2015?

4

5

6    A.    The 2015 loads used in the calculation of the forecast RSP drawdown provided on  
7    Schedule 4 of the Application are per the Amended GRA (see Exhibit 13, Schedule  
8    1.3.2, Pages 1 of 3). The 2016 loads used in the calculation of the forecast RSP  
9    drawdown are based on the most recent forecast prepared by Hydro's System  
10   Planning Department in the spring of 2015.
