

1    Q.    With regard to Schedule 4 of the Application, please provide the date of the load  
2    forecast used to generate the 2016 drawdown estimates and confirm whether this  
3    is the most recent load forecast information available to Hydro?

4

5

6    A.    The load forecast used to generate the 2016 IIC RSP Surplus drawdown estimates  
7    was prepared in the spring of 2015. Please see the response to IC-NLH-003 for the  
8    most recent IIC load forecast information available to Hydro.
