1    Q.    **IIC Rate Phase-in**

2            (Re: Amended GRA) On page 1.2 (lines 4 to 6) it is stated "*Rates for Island Industrial*  
3            *Customers (IC), however, have not been adjusted over that period and, therefore,*  
4            *these rates must be realigned to reflect the increased cost of providing service*". This  
5            statement refers to the period 2007 to 2014. Please provide a table for each year  
6            from 2007 through 2017 showing IC class energy demand, average revenue from  
7            the IC class in cents/kWh, average cost to supply the IC class based on embedded  
8            costs including RSP adjustments based on the allocation methodology that best  
9            reflects cost of service in cents/kWh, and average cost to supply the IC class based  
10           on marginal costs in cents/kWh.

13    A.    Hydro submits that this request is unreasonable, unduly onerous and seeks  
14           information which is beyond that which is relevant to the issues at hand. The time,  
15           effort, and expense involved in the compilation of the requested information is not  
16           warranted by or proportional to the relevance, if any, of the information sought, by  
17           the significance of that information in the proceeding, or by the probative value of  
18           the results.
