

1 Q. **IIC Rate Phase-in**

2 (Amended GRA, Schedule A) Please provide a table showing for each year Teck  
3 Resources and its predecessors were in operation in this Province (in Dollars and  
4 cents/kWh): energy consumed, revenues, cost of supply based on embedded costs  
5 including RSP adjustments based on an allocation methodology that best  
6 approximates cost of service, and cost of supply based on system marginal costs.

7

8

9 A. Hydro is unable to provide the sales and revenue data requested due to  
10 confidentiality concerns.

11

12 Hydro does not compute cost of service for a single Industrial Customer but on a  
13 class basis for the Island Industrial Customers. Therefore, the requested cost  
14 recovery information is not available and is not required for the Board's review of  
15 the reasonableness of the proposed rate for 2015 to apply to the Island Industrial  
16 Customer class.
