

1 Q. (Reference interim rates approvals in Board Orders No. P.U. 17(2015) and No. P.U.  
2 21(2015)) Following the approval of interim rates, what percentage rate increase is  
3 required to bring each customer class rate up to the rates proposed in the  
4 Amended 2013 GRA including all of the proposed rate adders/riders; i.e., such as  
5 the 2014 revenue deficiency, the 2015 revenue deficiency, etc?  
6  
7

8 A. Hydro submits that due to the uncertainty of a number of factors in determining  
9 future rates, a projection of customer rate impacts would not be meaningful at the  
10 present time. The amount of the 2014 and 2015 revenue deficiencies, as well as  
11 whether a portion of these amounts will be offset by existing RSP balances, creates  
12 a wide range of possible rate impacts. Hydro's response to PUB-NLH-485 provides  
13 forecast customer rate impacts excluding the recovery of the 2014 and 2015  
14 revenue deficiencies.
