

1 **Q. (Amended 2013 GRA) Does Dr. Wilson recommend that the costs associated with**
2 **the CBPP frequency converter be specifically assigned to CBPP as proposed by**
3 **Hydro? Please provide support for your response.**
4

5
6 **A.** That would appear to be an appropriate cost assignment if, as Hydro says, CBPP is the
7 primary beneficiary of the frequency converter (which allows CBPP to convert to 50 Hz
8 generation for use within its mill operations). An alternative suggested by IC, to remove
9 the frequency converter from Hydro's rate base in favor of a service contract between
10 Hydro and CBPP may also be feasible if these parties can agree upon such a contract.
