

1 Q. Hydro's responses to IN-NLH-114 and IC-NLH-88 list individual micro assets (e.g., by
2 size of pole, voltage of equipment, etc) and identifies the general function the micro
3 asset relates to (e.g. "Transmission" "Terminal Stations", "Generation", etc). Please
4 provide a breakdown of the lists provided by Hydro's responses to IN-NLH-114 and
5 IC-NLH-88 which identifies, by individual customer, each macro asset (e.g.,
6 transmission line from X to Y, terminal station at Z, generation plant A, etc.) that
7 these individual micro assets relate to, the date that macro asset was placed in
8 service, and the date the macro asset was specifically assigned to the individual
9 customer, if the assignment date is different from the in service date.

10

11

12 A. Please see IC-NLH-097 Attachments 1 (Revision 1), 2 (Revision 1), 3 (Revision 1) and
13 4 (Revision 1) for the asset listings provided in the responses to IN-NLH-114 and IC-
14 NLH-88 updated with the major asset groupings, (estimated) in-service dates based
15 on a review of the age of the individual assets, and the customer assignment dates
16 to the extent they differ from the in-service dates. The Table below shows the
17 asset additions for 2014 and 2015.

18

Customer	Location/Macro Asset	Name	In-Service Date
Newfoundland Power	Stephenville Terminal Station	TL-215 Replace Guy Wires	2014-12-01
Newfoundland Power	Western Avalon Terminal Station	Replace T5 Tap Changer - WAV	2014-12-01
Corner Brook Pulp and Paper	CBF Term Stn, Freq. Conv.	Install Online Vibration Monitoring System - CBF	2014-06-01
